Dear James,

I'm having issues in my neighborhood regarding new construction and the placement of loud/loose sewer covers on the street by city contractors. The sewer covers and new additions to drainage are being put in very poorly and are essentially potholes. The sewer cover clanks everytime a car drives over it and it is not even with current street surface making it a pothole. I contracted "Get it Done" 4 times and Councilman Lori Zapf twice without action.

This type of new construction in Bay Park and Morena Blvd not only adds height to our neighborhood's but the city comes in and puts new road infrastructure that is poorly installed and creates noise pollution. It is ridiculous that I now have to hear "clank clank clank" all the time while sitting in my living room. The city will not do anything to remedy it and are essentially ignoring me. I've noticed loud and loose covers up and down Morena Blvd and throughout my neighborhood. Any help or guidance you can offer as a community activist is appreciated.

Thank you,

Erik Swanson
